

## Surrey Boom Lift Operator Training

Surrey Boom Lift Operator Training - The cherry picker work platform is a kind of work platform, which would typically include a bucket or platform at the hydraulic lifting system's end. The device is also called a boom lift, man lift, hydraladder or basket crane.

The platform or bucket is sometimes set onto or mounted to a truck or other vehicle and is sometimes known as a bucket truck. Other motor vehicles that can be used are stand-alone trailers, self-moving platform or flat back pickup vans. The individual working stands and begins working within the bucket. The person inside the bucket usually consists of an upper set of controls enabling manipulation of the position of the bucket. The bucket's reach could be extended on various models by telescoping in order to adjust the lifting arm. Automatic safety controls prevent tipping. Articulated boom lifts are recommended when it is necessary to clear obstacles or for working in tight spaces.

As the name suggests, cherry pickers were constructed for picking fruit in trees at high levels. Cherry pickers are used in a variety of other industries, like for instance mining, exterior painting and construction. Sometimes they are used for cleaning windows on high building. The machines are utilized to service telephone, cable television and electrical equipment on utility poles. Fire fighters occasionally utilize cherry pickers, called snorkels, when ladders are inadequate. At Christmas time, civic workers could be seen in cherry pickers hanging lights and banners.
