

## Surrey Aerial Lift Training

Surrey Aerial Lift Training - An aerial work platform is a mechanical access platform. This machinery provides access to otherwise inaccessible areas for people or equipment. Also called an aerial device or elevating work platform, the machine is normally used to be able to access high places. Construction and maintenance staff often have to use aerial work platforms on the job. Firefighters utilize them for emergency access.

Meant for temporary use, aerial work platforms are different from elevators, which provide permanent access to high places. An aerial work platform is intended to be operated by a single individual, and can lift weights of less than one ton. Several types have load limits that are higher. There are various types of aerial work platforms; like for instance, there is a "scissor lift" and a "cherry picker".

Many of the aerial work platforms are outfitted with electrical outlets or compressed air connectors for power tools. For specialist tasks, like lifting frames for window glass, an aerial work platform could come together with special tools.

Anybody needed to operate an aerial lifting device requires training, together with their supervisors. Members of Health & Safety Committees and representatives responsible for inspecting aerial machine work areas also should undergo training. Trainees will know how to operate an aerial lift machinery. They will likewise gain an understanding of the rules that apply to the safe use of these machines. Regulations differ within different provinces, and in federally regulated worksites.

Workers who work near or are required to be lifted by an aerial lifting device must know all the possible dangers. In a general safety session, an Aerial Lift Training Video could be shown to educate all of the staff who work near them or are lifted by them.

Nearly all Aerial Lift Training Program would comprise modules which are focused on the following areas: hazard Identification; Aerial Lift Devices and Operating Controls; Pre Operational Checks for Aerial Lift Devices; and Platform Positioning & Park Positioning. The program is designed to train workers on the safe operation of self-propelled, elevated work platforms and boom supported, self-propelled, elevated work platforms. Employees who complete the program would be given a certificate, signed by a qualified person to verify the successful completion of a hands-on practical evaluation.
