## Surrey Aerial Lift Train the Trainer

Surrey Aerial Lift Train the Trainer - The train the trainer program intended for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial situation. Trainers would be provided with in-depth instruction about the workings of aerial lift machinery. The program is provided on an open enrollment basis and delivered at selected training sites. Prior to certification, trainers are assessed and scored based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider in the business, we provide top notch hands-on training. We provide plenty of chances to practice the techniques and concepts that are taught inside the classroom. Along with hands-on experience, trainers develop general knowledge of instructional techniques and machinery theory, field and classroom communication skills, and ability to successfully train and assess operators. Trainers would gain knowledge about what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program also teaches the right techniques necessary in order to express the right information in the classroom and field setting. There are three aspects of equipment operation that the trainer should learn how to convey to operators: what to do; how to do it; and the reason why it must be carried out.

In the program, trainers would be provided with the latest, detailed reference material to better help them convey the information to machine operators. The manuals utilized, include detailed information about all aspects of industrial mobile machine operator training. Included within the package are training aids which provide a visual reference to improve the learning experience. The equipment-specific training products contain essential materials for both the operator and the trainer: videos/DVD's, overhead transparencies, equipment models, safety message posters; stability pyramids and digital training aids.
